

Air Purification Systems for Transportation Vehicles

VEHICLE AIR PURIFICATION UNITS

- **Mobile Air Plus Unit:** for small vehicles, 265 CFM
- **Mobile ProAir Plus Unit:** for large vehicles, 445 CFM

GREEN FEATURES

- Easily mounts to existing vehicles with standard 12V DC current power connections.
- Durable all-metal housing, not plastic.
- Ozone-free filtration technology.
- Energy efficient.
- HEPA Plus filters with UVC light.
- Styrofoam free.
- North American sourced parts and assembly.
- Robust design for reliable continuous operation.

CLEANER VEHICLE AIR

Clean air is recognized as a vital component for transportation health and occupant safety. According to research from leading organizations, EPA and WHO, short term enclosed space air pollution may pose more of a public health risk than outdoor air pollution putting young children at risk.

Backed by unparalleled expertise in air quality control AllerAir air purifiers and filtration systems are individually customized to target the airborne pollutants in the transportation environment. AllerAir systems offer more filtration media than any other manufacturer, with the deepest carbon bed filters for chemical, gases and odors, superior medical grade HEPA filter for particle control and UVC lighting for virus control.

**Multi-stage Air Purification Technology
With HEPA filter and UV-C Light system that
removes 99.97% of particulate contaminants
while killing airborne bacteria and viruses.**
