

DR-10 Plus

Theory of operation.

The DR-10 Plus is an extremely-powerful, commercial-grade ozone generator for remediation and disaster restoration work. Its lightweight and compact design make it easy to take into and out of the different room. Its high-frequency generation technology ensures maximum ozone output with high humidity. After ozone treatment, the unit destroys ozone present in ambient air at high flow-rates. This high-flow destruct unit provides a quick turnaround time so that room can be reoccupation quickly. This device will significantly improve your work efficiency.

FEATURES OF DR-10 PLUS:

- Designed for expeditious turnaround treatment.
- Touch screen interface to change treatment time.
- Low maintenance
- Works well in high humidity environment
- High flow fans
- Plug and Play Operation

SPECIFICATIONS

Electrical	120 VAC 60 Hz 2.5 A
Generation Method	Corona Discharge
Continuous Use	Do not use continuously in occupied areas
Ozone Production	10 grams/hr
Supply Gas	Ambient Air
Dimensions	19 x 12 x 17 (L x W x H inches) / Weight: 45 lbs
