

safeair™ SafeAir™ ULTRA

Air and Surface Sanitizer

Combining Proven Technologies to Create Safe Indoor Spaces

Having to step outside for a breath of fresh air is now a thing of the past with the new SafeAir™ Ultra Sanitizing System. Replicating the way that a thunderstorm purifies our Earth from pollutants naturally, SafeAir™ harnesses this same power through **Active Purification Technology**. This safe and effective process, combined with NASA derived PCO technology works to rapidly destroy infectious viruses and oxidize odors and other potentially dangerous pollutants from indoor air and surfaces. In addition to continuously scrubbing your breathing air and hands on surfaces, SafeAir™ Ultra also integrates needlepoint ionization to release essential air vitamins, leaving your indoor space healthier and more vibrant than ever before.

- Destroys bacteria and viruses from the air and surfaces.
- Rapidly oxidizes indoor smoke, odors and allergens.
- Efficiently purifies spaces up to 3000 square feet.
- Sleek, stylish and sturdy design; available in 2 color options.
- LCD display includes "Away Mode," timer and room size settings.

Electrostatic Filtration

Collects large particles such as dirt, dust and pet hair; washable and reusable.

Activated Oxygen

Naturally inspired technology proven to rapidly break down odors and other pollutants.

Photocatalytic Oxidation

Works to destroy biological contaminants such as mold, bacteria and viruses.

Needlepoint Ionization

Provides your space with healthy, essential air vitamins to leave air fresh and vibrant.

Product Specifications

SKU - #SAULT

Product Size - 12" x 9" x 10.75"

Product Weight - 10.2 lbs

Shipping Weight - 12 lbs

Coverage - Up to 3000 square feet*

Power - 100-240 V (AC)

Ozone Output - 25-360 mg per hour

Ionization - 6 kv

Warranty - 1 year with purchase

*Actual coverage depends on variables such as the severity and frequency of pollutants, flow of air, humidity and temperature

MAP - \$699
