A WORLD LEADER IN FUME EXTRACTION TECHNOLOGY

Spark Arrestor 2

LASER

Last Updated on 13.04.2021

Prevents burning particulate from entering the fume extraction unit.

BOFA's Spark Arrestor unit effectively prevents potentially damaging, burning particulates generated during laser marking processes from entering the fume extraction unit.

Hot burning particulate is transported through the specially designed impingement plates positioned within the airflow, slowing the burning particulate down until it finally drops into the removable drop-out chamber, so protecting the fume extractor.

Technology

Multi voltage sensing (MVS) unit

ProTECT service plan

SureCHECK quality standard

Key features of the Spark Arrestor

Ideal for processes that generate burning particulate
Standard

Removable drop-out tray
Standard

Choice of inlet and outlet sizes
Standard

Technical specification

- 1. Inlet - 76.5mm / 125mm
- 2. Exhaust outlet - 76.5mm / 125mm
- 3. Hinged door
- 4. Castor wheels x 2
- 5. Locking castor wheels x 2
- 6. Warning beacon
- 7. Door latches
- 8. On / off switch
- 9. Temperature display
- 10. Power inlet
- 11. Filter plates
- 12. Drop out tray
- 13. Power outlet
- 14. Temperature sensor

Airflow through unit

Technical data

	EU	US
Dimensions (HxWxD)	670 x 415 x 535 mm	26.37 x 16.34 x 21.06"
Cabinet construction	Stainless steel	Stainless steel
Electrical data	100-230VAC 1ph Full load current: 0.5 amps	100-230VAC 1ph Full load current: 0.5 amps
Weight	40.5kg	89.28lbs
Approvals	UKCA and CE	

Unit part numbers

Model	Inlet / outlet size	Part no.
Spark Arrestor Stainless steel	76.5mm (3")	30106163-1924-1
Spark Arrestor Stainless steel	125mm (4.9")	30106163-1924-2
Spark Arrestor Stainless steel	Twin port version: 75mm ports and a spare set of 125mm ports	30106163-1924-3
